### Other

MS Office 97 - 2003, 2007  
MS Windows 2000, XP, Vista™

### Enhancements and revisions in Adagio Ledger 8.1A (2007.09.23)

- ◆ If you had ACCPAC Plus General Ledger open when you started Adagio Ledger 8.1A (2007.06.01) on the same database you received an error message saying "Your current version of Adagio Ledger is not compatible with the version of Adagio Ledger database you are currently using".
- ◆ Doing an export to Excel Direct (using menu or button) exported numbers which display as negative values in the Financial Reporter as zeroes in Excel.
- ◆ The toolbar buttons AutoSum, AutoFit Rows, and AutoFit Columns were not visible on the Format toolbar on a new install. You had to go into View | Customize and click Reset it to get all the buttons.
- ◆ In Adagio Ledger 8.1A (2007.06.01) backup up to some removable devices, such as a USB Key, reported the error "Cannot update an existing spanned disk set" and the backup could not be completed.
- ◆ The search criteria for smart finder were not remembered in Adagio Ledger 8.1A (2007.06.01) after closing the program.

### Enhancements and revisions in earlier versions of Adagio Ledger

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

### Installing

To install Adagio Ledger from the Adagio Product CD you need the serial number and install code from the Product Label that came with your CD.

If you are installing an upgrade, you need the serial number and install code that came with your upgrade. A previous version of Adagio Ledger should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from your previous version.

If you are installing a Service Pack, you do not need to enter a serial number or install code. However, a previous version of Adagio Ledger 8.1A must be installed before the Service Pack can be installed.

To install Adagio Ledger (or an upgrade), insert the CD in the drive. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Or, if Adagio Ledger was downloaded, run the program file you downloaded. Once the install program is running, you can click the View button to open the Readme file for detailed instructions. If Adagio Ledger is installed on a network, you must also do a workstation install for each workstation running Adagio Ledger. Refer to "Installing on a network" in the Readme for instructions.

-- over --

To install the Adagio Ledger Service Pack, run the Service Pack program and follow the instructions on the screen. After installing the Service Pack, a workstation install may be required at each station running Adagio Ledger. To determine if a workstation install is required, start Adagio Ledger at the workstation. The workstation install will be automatically started if required. Note: If you are updating multiple applications at the same time, it may be faster to run the all workstation install to update all applications at once on the station. Refer to "Installing on a Network" in the Readme for instructions.

## Upgrading to this Version

All Adagio 8.1A modules, including Adagio Ledger, require Adagio Lanpak to be version 8.1A or higher. For a limited time, Softrak is offering to provide V8.1A Lanpak licenses for each of your current V6.8A Lanpaks at no charge.

Financial specifications created by or edited by Adagio Ledger 8.1A are not guaranteed to work with earlier versions of Adagio Ledger.

Import / Export templates from Adagio Ledger 8.1A are not guaranteed to work with earlier versions of Adagio Ledger.
