Enhancements and revisions in Adagio Receivables 8.0A (2006.06.25)

- ◆ Compatible with Adagio BankRec 8.0A when used with multi-currency databases.
- ◆ On the Invoice Posting Journal, the size of the Invoice Number field only allowed for 8 of the possible 12 characters.
- ◆ The Statement Total (F1) and Current by Due Date total (F9) were incorrect when there was a prepayment with a discount and no invoice for the discount or the original invoice had been purged.
- ◆ In the cash batch entry grid, if the customer had enough transactions to fill the grid and the right hand slider bar appear, clicking the last line on the grid scrolled down when it should have selected the line.

Enhancements and revisions in earlier versions of Adagio Receivables

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

Installing

To install Adagio Receivables from the Adagio Product CD, you need the serial number and install code from the Product Label that came with your CD.

If you are installing an upgrade, you need the serial number and install code from the Upgrade Product Label that came with your upgrade CD. A previous version of Adagio Receivables should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from your previous version.

If you are installing a Service Pack, you do not need to enter a serial number or install code. However, a previous version of Adagio Receivables 8.0A must be installed before the Service Pack can be installed.

To install Adagio Receivables (or an upgrade), insert the CD in the drive. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Once the install program is running you can click the Help button for detailed instructions. If Adagio Receivables is installed on a network, you must also do a workstation install for each workstation running Adagio Receivables. Refer to the manual or "Installing on a network" in the Readme help for instructions.

To install the Adagio Receivables Service Pack, run the Service Pack program and follow the instructions on the screen. After installing the Service Pack, a workstation install may be required at each station running Adagio Receivables. To determine if a workstation install is required, start Adagio Receivables at the workstation. The workstation install will be automatically started if required. Note: If you are updating multiple applications at the same time, it may be faster to run the all workstation install to update all applications at once on the station. Refer to "Installing on a Network" in the Readme for instructions.

Upgrading to this Version

There are no special instructions for upgrading to this version. A database conversion is not required.

Note 1: Statement specifications created with Adagio Receivables 8.0A cannot be used with earlier versions of Adagio Receivables.

Note 2: Adagio Ledger 8.0C or higher is required for multi-currency Adagio Receivables databases.
