MS Office 97 – 2003, 2007  
MS Windows 2000, XP, Vista™

### Enhancements and revisions in Adagio Receivables 8.1A (2007.09.20)

- ◆ If you had data for Adagio Invoices 6.8B (2005.09.22) or older in your company data directory, or data for any version of Quik Invoice Plus for DOS, when you started Adagio Receivables 8.1A (2007.06.03) you received the error message saying "Your current version of Adagio Receivables is not compatible with the version of Adagio Invoices database you are currently using". If your Adagio Invoices was version 8.0A (2005.12.27) or higher this error did not occur.
- ◆ If you had data for Adagio Inventory 6.8B (2004.11.13) or older in your company data directory, or data for ACCPAC® Plus™ 6.1B, when you started Adagio Receivables 8.1A (2007.06.03) you received the error message saying "Your current version of Adagio Receivables is not compatible with the version of Adagio Inventory database you are currently using. If your Adagio Inventory was version 8.0A (2005.05.16) or higher this error did not occur.
- ◆ If you are using ACCPAC® Plus™ General Ledger 7.0A you received the error message saying "Your current version of Adagio Receivables is not compatible with the version of Adagio Ledger database you are currently using. If you are using any version of Adagio Ledger this error did not occur. Note that Adagio Ledger converts Plus G/L 7.0A databases to a compatible format.
- ◆ Adagio Receivables 8.1A (2007.06.03) forced you to enter a Salesperson in a Customer before you could save.
- ◆ Some settings such as bin and paper size made in the printer Setup were ignored when printing forms (statements and letters).
- ◆ If you had ACCPAC Plus Accounts Receivables, General Ledger, Inventory Control or Order Entry open you could not open Adagio Receivables 8.1A (2007.06.03) on the same database.
- ◆ The G/L Transaction batch could not be retrieved in Ledger for new databases created with Adagio Receivables 8.1A (2007.06.03).
- ◆ In Adagio Receivables 8.1A (2007.06.03) backup up to some removable devices, such as a USB Key, reported the error "Cannot update an existing spanned disk set" and the backup could not be completed.
- ◆ You can now import and export the 'Active' flag in customers.
- ◆ Some field ranges for Adagio Time&Billing related fields were not remembered on report dialogs.
- ◆ When entering adjustments for databases interfaced to Adagio Time&Billing you received an error 'Invalid job number' in some cases.
- ◆ The search criteria for smart finder were not remembered in Adagio Receivables 8.1A (2007.06.03) after closing the program.
- ◆ The Pre-Revaluation Listing report reported an error and could not be printed in some cases.

### Enhancements and revisions in earlier versions of Adagio Receivables

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

-- over --

## Installing

To install Adagio Receivables from the Adagio Product CD, you need the serial number and install code from the Product Label that came with your CD.

If you are installing an upgrade, you need the serial number and install code from the Upgrade Product Label that came with your upgrade CD or download instruction email. A previous version of Adagio Receivables should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from your previous version.

If you are installing a Service Pack, you do not need to enter a serial number or install code. However, a previous version of Adagio Receivables 8.1A must be installed before the Service Pack can be installed.

To install Adagio Receivables (or an upgrade), insert the CD in the drive. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Or, if Adagio Receivables was downloaded, run the program file you downloaded. Once the install program is running you can click the Help button for detailed instructions. If Adagio Receivables is installed on a network, you must also do a workstation install for each workstation running Adagio Receivables. Refer to the manual or "Installing on a network" in the Readme help for instructions.

To install the Adagio Receivables Service Pack, run the Service Pack program and follow the instructions on the screen. After installing the Service Pack, a workstation install may be required at each station running Adagio Receivables. To determine if a workstation install is required, start Adagio Receivables at the workstation. The workstation install will be automatically started if required. Note: If you are updating multiple applications at the same time, it may be faster to run the all workstation install to update all applications at once on the station. Refer to "Installing on a Network" in the Readme for instructions.

## Upgrading to this Version

Adagio Receivables 8.1A converts databases from earlier versions. Once converted the database is no longer compatible with earlier versions.

**All Adagio 8.1A modules, including Adagio Receivables, require Adagio Lanpak to be version 8.1A or higher.**

Import / Export templates from Adagio Receivables 8.1A are not guaranteed to work with earlier versions of Adagio Receivables.

Statement specifications created or edited with Adagio Receivables 8.1A cannot be used with earlier versions.

Note 1: Adagio Ledger 8.0C or higher is required for multi-currency Adagio Receivables databases.

Note 2: Adagio JobCost must be 6.8B (2006.12.16) or higher.
