### Note

The most up-to-date  
compatibility information is on  
the Product Compatibility Info  
link at [www.softtrak.com](http://www.softtrak.com).

## Enhancements in BoM

- Compatible with OrderEntry 9.3B.

## Enhancements and revisions in earlier versions

Refer to the Readme help file for details of enhancements and revisions in earlier versions or Change Log under [Documentation](#) for this module on Softrak's web site.

## Installing

To install Adagio BoM you need the serial number and install code from the download instruction email sent to you by Softrak Systems.

If you are installing an upgrade, you need the upgrade serial number and install code from the download instruction email. A previous version of Adagio BoM should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from a previous version.

To install Adagio BoM or an upgrade, run the program file you downloaded. Once the install program is running, you can click the View button for detailed installation instructions in the Readme help.

Adagio BoM does not require a workstation install.

**After initially installing Adagio BoM (i.e. a new full install but not an upgrade), you must either run a Data Integrity Check in Adagio Inventory or print the Bills of Material report before editing Bills of Material, assembling master items, or running Day End in OrderEntry.** If this is not done the Additional Cost in Bills of Material will be zero.

## Upgrading

### Upgrading from 9.2A

There are no special requirements when upgrading.

**Upgrade Complexity:**

Easy ●

### Upgrading from 9.3A

There are no special requirements when upgrading.

**Upgrade Complexity:**
