### Other

Any product for which an Adagio Data Dictionary has been created  
Excel Workbooks  
Island Microsystems products  
DSN / UDL data sources  
MS Office 2007, 2010, 2013  
MS Windows Vista, 7, 8, 8.1  
Purchase Orders for Adagio 8.1B  
Any product that uses the Adagio Data Source (ADS)

### Note

The most up-to-date compatibility information is on the Product Compatibility Info link at [www.softrak.com](http://www.softrak.com).

## Enhancements

- Trend Lines have been added as an option on Line charts. When calculating the trend line, blank cells (blank on zero) will be treated as #NA values and be excluded from the calculation. 0.00 values will affect the trend line.
- You can now plot more data points on a chart.
- Compatible with Adagio Console and respects requests to shut down.
- Includes 64-bit version.

## Problems Fixed

- Chart Scale and Tilt are now properly saved
- Charts sometimes opened with 0 height, rendering them invisible but enabled.
- ChartView does a better job of determining the first numeric column to chart.

## Enhancements and revisions in earlier versions

Refer to the Readme help file for details of enhancements and revisions in earlier versions or [Historical Enhancements](#) under Products on Softrak's web site.

## Installing

Adagio ChartView is an Add-on product for Adagio GridView. Adagio GridView 9.2A must be installed before installing the ChartView Add-on. Adagio ChartView and Adagio GridView must be at the same version. If the version of ChartView does not match the version of GridView the ChartView functions are disabled in GridView.

ChartView does not use Adagio Lanpak licenses.

A Not For Resale (NFR) version of Adagio ChartView is not available and is not needed. The NFR version of GridView provides full ChartView functionality. An Evaluation version of Adagio ChartView is not available. If ChartView is not installed, GridView includes the ChartView functionality but charts will only display for 10 seconds.

To install Adagio ChartView, you need the serial number and install code from the download email sent to you by Softrak Systems.

If you are installing an upgrade, you need the serial number and install code from the upgrade download instruction email. A previous version of Adagio ChartView should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number

and install code, you will also have to enter the serial number and install code from your previous version.

**Read the 'Upgrading' section below before installing an upgrade.**

To install Adagio ChartView, an upgrade, or Service Pack, run the program file you downloaded. Once the install program is running, you can click the View button for detailed installation instructions in the Readme help.

## Upgrading

**Upgrading to this Version**

**Upgrade Complexity:**

**Easy ●**

**You may need to reset the toolbar to show new buttons added in 9.2A.** Select View | Customize from the menu, then select each of the Toolbar's options and click the Reset button.

Note: When the GridViewRW add-on is active (i.e. GridView is started with the /RW parameter on the command line), the ChartView functions in GridView are not available.
