Enhancements in EFT

- Compatible with Adagio Payables 9.2A.

Problems Fixed

- There was a false warning message saying EFT was not compatible with Payables 8.1F when installing Adagio EFT 8.1E.

Enhancements and revisions in earlier versions

Refer to the Readme help file for details of enhancements and revisions in earlier versions or [Historical Enhancements](#) under Products on Softrak's web site.

Installing

Adagio EFT is an Add-on product for Adagio Payables. Adagio EFT requires Adagio Payables be installed and at the matching version. Adagio Payables must be 9.2A.

To install Adagio EFT you need the serial number and install code from the download instruction email sent to you by Softrak Systems.

If you are installing an upgrade, you need the upgrade serial number and install code from the download instruction email. A previous version of Adagio EFT should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from a previous version.

To install Adagio EFT or an upgrade, run the program file you downloaded. Once the install program is running, you can click the View button for detailed installation instructions in the Readme help. Adagio EFT does not require a workstation install.

Important Notes

Adagio EFT is limited to one EFT bank per database.

EFT payments must be in the currency of the bank account.

Adagio EFT sends EFT payments to Adagio BankRec in detail (the same as Payables sends checks to BankRec in detail). This allows individual payments to be reversed but also requires payments to be individually reconciled. This can be automated by importing your

bank statement, automatically matching and reconciling EFT transactions. If you only want to reconcile the total of an EFT run or your bank does not send details in the statement, you can create a separate EFT bank in BankRec to hold the EFT payments in detail and transfer the total to the actual bank for reconciliation.

Adagio EFT supports the Canadian Payments Association Standard 005 (Standards for the Exchange of Financial Data of ATF Files) and EFT file formats for several Canadian banks.

Contact Softrak Systems Inc. to inquire if the EFT file format for your bank is supported in a more recent version. Softrak will include implementation of support for one new file format with the purchase of Adagio EFT, providing the file is in an acceptable format and documentation of the EFT file format is provided to us by the user. The user is responsible for contacting their banking institution to obtain the required documentation and forwarding it to Softrak.
