General Ledger 6.1A, 6.5A, 7.0A

### ACCPAC Simply Accounting®

Version 9 to 2003

### QuickBooks®

Version 2000 to 2003

### Enhancements and revisions in Adagio FX 8.0B (2003.11.18)

- ◆ QuickBooks users may now treat Classes as departments when the data is retrieved. By selecting this option, FX's side-by-side drag and drop departmental comparatives can be created for QuickBooks datasets with a few mouse clicks.
- ◆ When retrieving data and assigning it to a department, you can now preserve some (or all) of the incoming department identifier, should your ledger already use departments. By using " ? " or " \* " in the department number target, Adagio FX will replace the wildcard characters with those in the same positions in the source account-department. Refer to the Help text for examples of how this feature works. Used in conjunction with wildcards in the financial reporter, you can now combine multiple sets of data and maintain their departments for analysis.
- ◆ For QuickBooks users, the financial reporter supports the new field "gldata.TOTPOST" to display the total amount that has been posted to an account across all fiscal years. This field will return zero (\$0.00) in data retrieved from other accounting sources.
- ◆ In the financial reporter, single character department codes now right justify properly, and single department ranges are process properly. New fields have been added to the transaction drill down for multi-currency transactions to display the Source Currency Amount, Exchange Rate and Date. You can now use "\*" in the definition of .Range and .Verify accounts.

### Enhancements and revisions in earlier versions of Adagio FX

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

### Installing

To install Adagio FX, you need the serial number and install code from the Product Label that came with your CD or was provided in the email from Softtrak Systems.

If you are installing an upgrade, you need the serial number and install code from the Upgrade Product Label that came with your upgrade CD or was provided in the email from Softtrak Systems. A previous version of Adagio FX should already be installed on your computer before installing the 8.0B upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from your previous version.

To install Adagio FX (or an upgrade), run the program file you downloaded, or if Adagio FX was provided on CD, insert the CD in the drive and the install program will be started automatically. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Once the install program is running, you can click the View button for detailed instructions in the Readme help. If Adagio FX is installed on a network, you must also do a workstation install for each workstation running Adagio FX. Refer to the manual or to the "Installing on a Network" section in the Readme for instructions.
