Enhancements and revisions in Adagio Invoices 6.8B (2005.01.13)

- ◆ Compatible with Adagio JobCost.
- ◆ When applying a payment to an invoice that has retainage, you received a warning that the payment amount was not equal to the total amount of the invoice even when in fact it was equal.

Enhancements and revisions in earlier versions of Adagio Invoices

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

Installing

To install Adagio Invoices from the Adagio Product CD you need the serial number and install code from the Product Label that came with your CD.

If you are installing an upgrade, you need the serial number and install code from the Upgrade Product Label that came with your upgrade CD. A previous version of Adagio Invoices should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from your previous version.

If you are installing a Service Pack you do not need to enter a serial number or install code. However, a previous version of Adagio Invoices 6.8B must be installed before the Service Pack can be installed.

To install Adagio Invoices (or an upgrade), insert the CD in the drive. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Once the install program is running you can click the View button for detailed instructions in the Readme help. If Adagio Invoices is installed on a network, you must also do a workstation install for each workstation running Adagio Invoices. Refer to the manual or "Installing on a network" in the Readme help for instructions.

To install the Adagio Invoices Service Pack, run the Service Pack program and follow the instructions on the screen. After installing the Service Pack, a workstation install may be required at each station running Adagio Invoices. To determine if a workstation install is required, start Adagio Invoices at the workstation. The workstation install will be automatically started if required. Note: If you are updating multiple applications at the same time, it may be faster to run the all workstation install to update all applications at once on the station. Refer to "Installing on a Network" in the Readme for instructions.

Upgrading to this Version

There are no special instructions for upgrading to version 6.8B. A database conversion is not required. Note: Adagio Invoices does not support multi-currency.

Note: Invoice and Credit Notes specifications created with Adagio Invoices 6.8B cannot be used with earlier versions of Adagio Invoices.
