Ledger 6.8A - 8.0D (see Note3)	
OLEDB 6.8A, 8.0A	

Enhancements and revisions in Adagio JobCost 6.8B (2006.12.16)

♦ Compatible with Adagio Receivables 8.0B when interfaced at the Phase or Category level.

♦ If the date on the login screen was blanked out, the database was opened with a date of 1899.

♦ The decimal point was wrong on the Retainage percentage field on the Billing Worksheet.

♦ In the retrieve function, if you selected payroll only when there were other types of batches to retrieve the Proceed button could not be selected.

♦ For jobs with the 'simple costed jobs' setting enabled, the Batch Listing report printed an 'invalid estimate' message for estimates that used either phases or descriptions for a cost entry.

♦ An error was displayed when printing the Billing and Payment Posting Journal if you had previously partially printed and cleared the journal. This has been corrected and existing posting journals will be covered in most cases. However, in some cases the posting journal cannot be corrected and will be lost.

♦ Retrieving the AP batch from a path different than the JC data directory did not work if JC was stared from an icon that passed in the database path in lower case.

♦ The translated codes are now shown for the 'Trx Type' field in Job Cost Detail file in GridView.

♦ After converting to Adagio JobCost from ACCPAC® Plus™ Job Costing run without AR and adding Adagio Receivables, the Job Status report and other reports printed the customer name from the original JC customer file rather than the Adagio Receivables customer file.

♦ The Job Status report now prints all Billings and Payments transactions regardless of the range for 'Trans dates'. Only the Costs are affected by the date range.

♦ Sample data has been updated for AR 8.0B. The JC, AP, GL, IC and Invoices sample data has also been updated, including adding an AP spec for the CCRA T5018 Statement of Contract Payments form.

Enhancements and revisions in earlier versions of Adagio JobCost

♦ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

Installing

To install Adagio JobCost from the Adagio Product CD you need the serial number and install code from the Product Label that came with your CD.

If you are installing a Service Pack you do not need to enter a serial number or install code. However, a previous version of Adagio JobCost 6.8B must be installed before the Service Pack can be installed.

-- over --

To install Adagio JobCost, insert the CD in the drive. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Or, if Adagio JobCost was downloaded, run the program file you downloaded. Once the install program is running you can click the View button for detailed instructions in the Readme help. If Adagio JobCost is installed on a network, you must also do a workstation install for each workstation running Adagio JobCost. Refer to the manual or "Installing on a network" in the Readme help for instructions.

To install the Adagio JobCost Service Pack, run the Service Pack program and follow the instructions on the screen. After installing the Service Pack, and depending on the version you were running prior to installing it, a workstation install may be required at each station running Adagio JobCost. To determine if a workstation install is required, start Adagio JobCost at the station. The workstation install will be automatically started if required. Note: If you are updating multiple applications at the same time, it may be faster to run the all workstation install to update all applications at once on the station. Refer to "Installing on a Network" in the Readme for instructions.

Note 1: Adagio Payables must be version 6.8B (2005.01.12) or later. Adagio Receivables must be version 6.8B (2004.05.07) or later. Adagio BankRec must be version 6.8B (2004.11.30) or later. Adagio Inventory must be 8.0B or later. Adagio Invoices must be version 6.8B (2005.01.13) or later.

Note 2: Adagio JobCost and Adagio Time&Billing cannot be used on the same company database.

Note 3: Adagio JobCost requires Adagio Ledger 8.0C or higher if you have a multi-currency GL database.
