SalesCQ 8.1A - 8.1B
Time&Billing 6.8A – 8.1B

Other

Any product that uses the Adagio
Data Source (ADS)
MS Windows XP, Vista, 7

Enhancements and revisions in Adagio Lanpak 9.0D (2011.06.30)

- ◆ Compatible with new module Adagio ePrint.
- ◆ Compatible with and required by new versions of Adagio modules with a release date in June 2011 or later.
- ◆ The version of the Adagio Data Source (ADS) and ExcelDirect installed include fixes and enhancements allowing for improvements in Adagio modules.
- ◆ This version moves toward our goal of a more Windows 7 friendly environment for installation. If you are installing to a mapped network drive that is normally accessible, but you cannot see it during the install when attempting to select a drive or folder, you can now install by browsing to the correct folder using the Universal Naming Convention (UNC), for example \\myserver\accounting\. This avoids having to adjust the User Account Control settings, which requires you to restart your computer and temporarily grant Administrative privileges to the user if they are not an administrator.
- ◆ The install writes to the master install log file "AdagioMasterInstall.log" in the \softrak\system folder. This log shows the version installed and the version being replaced, the name of the Windows user who did the install and the rights for that user. An entry is also written to the log when an updated version of the Adagio Data Source (ADS) is installed, showing the version installed and the version being replaced. This log can be used to quickly determine the install history for all Adagio programs.

Enhancements and revisions in earlier versions of Adagio Lanpak

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions or [Historical Enhancements](#) under Products on Softrak's web site.

Installing

To install Adagio Lanpak you need the serial number and install code from the download email sent to you by Softrak Systems.

If you are installing an upgrade, you need the serial number and install code that came with your upgrade. A previous version of Adagio Lanpak should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from a previous version.

To install Adagio Lanpak, run the program file you downloaded. Once the install program is running you can click the View button for detailed instructions.

If Adagio is installed on a network, you must install the Lanpak to the network drive where the Adagio applications are installed.

If you have installed a Client NFR (Not for Resale) version of Adagio Lanpak, you must uninstall it before installing a full product version. Failure to do so will result a message saying you are running a NFR version, even if a full product version of the Lanpak is installed and licensed. If a full product version is already installed, use the selective uninstall program to uninstall just the NFR version. The selective uninstall found in \softrak\system\lanpak\LanpakSelectiveUninstall.exe.

Client NFR Lanpaks must not be installed if a full product version of Lanpak is already installed or the full Lanpak will expire.
