SalesAnalysis 8.0A, 8.1A

Other

MS Office 97 – 2003, 2007
MS Windows 2000, XP, Vista

Enhancements and revisions in Adagio MultiCurrency 8.1A (2007.06.07)

- ◆ Compatible with Windows® Vista™.
- ◆ Compatible with Adagio Lanpaks 8.1A. Lanpaks must be 8.1A for all Adagio 8.1A modules.
- ◆ Smart Finder can now search on multiple criteria.
- ◆ Contents of disabled fields are shown in blue rather than dimmed gray. This may be easier to read on some monitors at higher resolutions.
- ◆ Adagio download files, installs, workstation installs, all workstation install (\softtrak\allwkst\allwkst.exe), and the Adagio Check System utility (chksys.exe) are now signed with a digital certificate using VeriSign to allow you to verify the Publisher is Softrak Systems Inc.
- ◆ Vista does not support the old style Windows Help (.HLP files). All .HLP files were converted to compiled HTML help (.CHM files), which are supported by Vista.
- ◆ For security reasons Windows does not permit .CHM help files to be run from a network drive. This is true in XP as well as Vista. The .CHM files must be run from a local drive. Adagio 8.1A installs all .CHM help files to your local hard drive and loads them from there. The workstation install also copies .CHM files to the local drive.
- ◆ When switching window/task in Vista with Alt-Tab or the new Flip 3D (Windows-Tab) an image of the current Adagio screen is shown rather than just the icon of the Adagio program.
- ◆ You can now backup Adagio data in zip form to WebSafe, a web-based storage facility. WebSafe is a service which allows you to store your important information in a secure location that you can access from anywhere in the world. See www.websafe.com for details.
- ◆ Currency symbols other than \$ are now supported in reports.
- ◆ The formatting of dates and text sent to Excel from Smart Finder results has been improved.

Enhancements and revisions in earlier versions of Adagio MultiCurrency

- ◆ Refer to the Readme help file for details of enhancements and revisions in earlier versions.

Installing

To install Adagio MultiCurrency from the Adagio Product CD you need the serial number and install code from the Product Label that came with your CD.

If you are installing an upgrade, you need the serial number and install code from the Upgrade Product Label that came with your upgrade CD. A previous version of Adagio MultiCurrency should already be installed on your computer before installing the upgrade. If a previous version is not already installed, you can still install the upgrade. After entering the upgrade serial number and install code, you will also have to enter the serial number and install code from your previous version.

To install Adagio MultiCurrency (or an upgrade), insert the CD in the drive. If the install program does not start automatically, run ADAGIO.EXE from the root of the CD. Or, if Adagio MultiCurrency was downloaded, run the program file you downloaded. Once the install program is running, you can click the View button to open the Readme file for detailed instructions. If Adagio MultiCurrency is installed on a network, you must also do a workstation install for each workstation running Adagio MultiCurrency. Refer to "Installing on a network" in the Readme for instructions.
